

2022 Term 4 P&C Canteen Report

Environmental

Our introduction of Polly to collect returnable drink containers is going well. So far over 300 containers have been returned for cash.

We have also eliminated all single use plastic utensils and cups in the Canteen and run our own soft plastic recycling. We will continue to look for ways to reduce plastics in the Canteen

Financial results

We have been experiencing an increase in sales and income due to the necessary price increases and the expansion of the menu on some days.

Birthday buckets are also proving very popular to both parents and children.

The Canteen will be trialling the provision of food to BASC with the aim to cater to this group of children next year. This will add to the Canteen's bottom line.

General

We have a core of dedicated volunteers whom we really appreciate. New people are always welcomed and we would love to see new Kindergarten parents next year.
